

WORLD ENVIRONMENT DAY

Thursday, 5th June 2025

Here are some ideas for you to try at home.

1. Don't use plastic straws; instead make your own paper straws. You could use the template provided to make your own using cutting and sticking.
2. Before you throw away the plastic recycling, think about what you could make with it.

There are lots of ideas here that use plastic recycled bottles:

[Recycled Plastic Bottle Ideas for Kids - Kids Art & Craft](#)

3. Create Art in the style of David Edgar.

4. When you have an ice-cream from a shop or a van; ensure you only pick one with a cone, not in a plastic container.
5. Snack on fruit, so that you are not buying snacks that come in little bags made of plastic.

Remember to check with your grown up before you try any of these activities.

Make sure you have an adult near you to watch that you are keeping safe when creating any sculptures or art works.
